

HF Multi-Band Mobile Antenna

This rugged, multiband antenna includes resonators for 75, 40, 20, 15, & 10 Meters

Radioware's HF Multi-Band Mobile antenna can operate from 75 through 10 meters. The 20, 15, & 10 meter resonators (side mounting in picture) cover the normal SSB ranges without any tuning. The 75 and 40 meter resonators (top mounting) are interchangeable and easily tunable. Note that both 75 and 40 meter resonators cannot be installed at the same time.

All resonators use standard 3/8 x 24 type screw in bases for easy set-up and mount on a solid 4 ft aluminum mast. The mast fits in any 3/8 x 24 TPI mount, but the mount should be a heavy duty one or quad magnet mount. Overall length is about 7.5 ft and the longest side mounting resonator is 21 inches.

Catalog #	Item Description	Unit Price
HFMBM	HF Multi-Band Mobile Antenna	\$89.95

Canadian Price = \$149.99
